github.com/Franz07-dev

PROFESSIONAL SUMMARY

Motivated Business student at the University of Connecticut with experience in data analysis, business operations, and information technology. Certified in Bloomberg Market Concepts and skilled in Excel, SQL, and SAS. Skilled in data-driven decision-making, developing analysis models and optimizing business practices.

EDUCATION

Bachelor of Science in Computer Science

April 2023

Cavite State University, Indang, Cavite, Philippines

Related Coursework: Data Structures & Algorithms, Object-Oriented Programming, Databases, Web Development, Software Engineering

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, PHP, VB.NET

Frameworks & Libraries: React, Laravel, Tailwind CSS

Tools & Platforms: Git / GitHub, VS Code, XAMPP, MySQL, Figma, Canva

PROFESSIONAL EXPERIENCE

Web Developer

August 2025 – Present

Caball Tech Corp (Startup), Biñan, Laguna, Philippines

- Designed and developed the company landing page from scratch using HTML, CSS, JavaScript, Tailwind CSS and React, creating a modern, responsive first impression for a mobile-first application.
- Built the admin dashboard interface with PHP, MySQL and React, enabling secure content management and user role-based access for the startup's core product.
- Collaborated closely in a 4-person team (1 Android Dev, 1 iOS Dev, 1 UI/UX Designer, myself) to define web vs. native app strategy, contributing technical insights during planning discussions.
- Transitioned into web development role after starting as UI/UX designer, applying Figma prototypes directly into functional code

Machine Technician

January 2025 – July 2025

Philkostat Inc., Biñan, Laguna, Philippines

- Troubleshoot and repaired carrier tape molding machines under tight time constraints (often 1–2 hours), minimizing production downtime.
- Set up complex machinery independently or in pairs, ensuring accurate calibration and operation for high-precision manufacturing.
- Provided ad-hoc IT support by diagnosing and fixing PCs, printers and basic network issues in a company without a dedicated IT staff.
- Operated production machines during peak periods, gaining hands-on understanding of hardware-software integration.

Warehouse Staff (via D'Jobsite Agency)

July 2023 – September 2024

NEWBIE (Lazada Warehouse), Biñan, Laguna, Philippines

- Handled picking, packing, and inventory in high-volume outbound operations, learning e-commerce logistics
- Assisted with computer/printer troubleshooting during busy shifts to maintain workflow

PROJECTS

Frontend Practice & UI Projects - Personal Projects

(2025)

- Built responsive landing pages (e.g., Coffee Shop, Portfolio) with HTML, CSS, Tailwind CSS, focusing on mobile-first design

Admin Task Manager Application - Personal Project

(2023)

- Developed CRUD system for task creation, assignment, and tracking with PHP/MySQL backend and validation

Full-Stack E-Commerce Platform - Capstone Project

(2022)

- Built complete site with catalog, authentication, cart, and orders using React, PHP, MySQL; deployed on Hostinger

Hospital Management System - Academic Project

(2021)

- Created backend system for patient records and inventory using PHP/MySQL, exceeding frontend-only requirements

Game Development - Academic & Personal Projects

(2018–2019)

- Created backend system for patient records and inventory using PHP/MySQL, exceeding frontend-only requirements
